

Q.3 Program: Factorial of a Number

Aim:

To find the factorial of a number.

Algorithm

1. Start.
2. Input n .
3. Set $fact = 1$.
4. Set $i = 1$.
5. Repeat until $i > n$:
 - $fact = fact \times i$
 - $i = i + 1$
6. Display $fact$.
7. Stop.

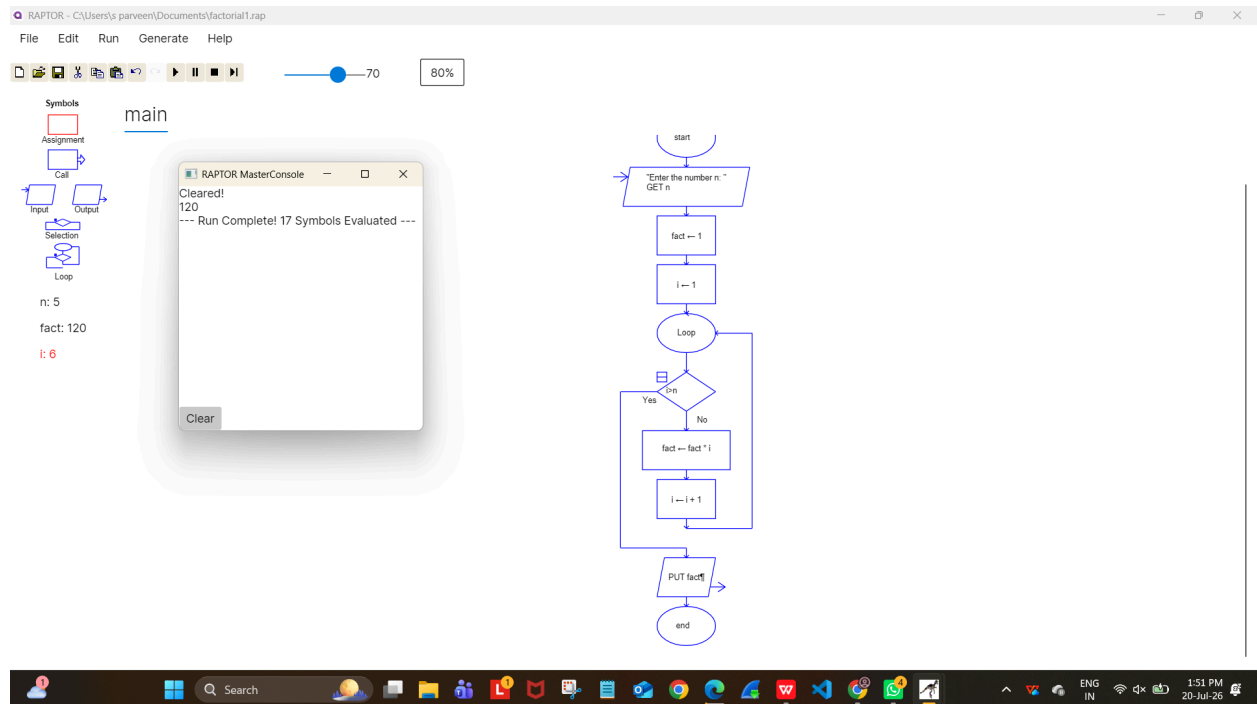

Input

- Number = 5

Output

- Factorial = 120

Snapshot from Raptor :

Result

The factorial of the given number is calculated successfully.
